

Manufactured to match its big brothers Ledge and Strato, the Switchback is designed to be an accessible climber, an industry first! The lowest platform of the Switchback conforms to guidelines for transfer platforms. Manufactured with various handholds and climbing surfaces, the four sides all vary in climbing difficulty. The Switchback also accepts 3' slides, so reward the little ones that reach the summit!

## Installation Instructions

**NOTE:** Read installation instructions thoroughly before starting installation process.

**Step 1:** Lay out the area and prepare the site for install. Concrete must be installed over a solid, level base. Check local soil condition and codes. See installation instructions sheet for minimum use zone requirements to ensure proper spacing and adequate surfacing area.

**Step 2:** Pour a concrete base for the Switchback Rock Climber. Refer to the typical slab section on this page. The concrete should be flush with the ground level. Allow time for the concrete to completely cure before continuing.

**Step 3:** Using an appropriate lull-type forklift or boom, place Switchback Rock Climber into final installation location. See the hardware recommendation page for information on anchoring equipment down to your slab. Refer to the surfacing manufacturer for installation of an approved impact attenuating play surface around the Switchback Rock Climber with a minimum of 6 feet in every direction.

**Note:** See separate installation instructions for Switchback Slides when installing Switchback Rock Climber product number 1000033.
