

The Strato Rock's "little brother". Don't let the description fool you, it's crafted using the same Glass Fiber Reinforced Concrete (GFRC) construction and has the same great climbing features and durability as its big brother. Cre8ed to be linked to the Strato, these two siblings can produce a new climber that can span 18 feet in length. Or, connect them together with one of our Rope Links (8000001, 8000200 thru 8000205) to attach to the Ledge Rock Climber w/Rope Tabs.
